

Report of the Slovenian history competition 209 /2010

“Money”

Slovenian organizers organized in school year 2009/2010 a history competition with the title “Money”. Finally we received 13 papers made by 20 students. The small number of papers might be a result of different reasons among them is also the probably “unusual topic”. But we already had accepted that there were ups and downs in this kind of projects. Papers were mainly from the same schools as usual.

Among the contributions there were some very good entries presenting interesting approaches. The award ceremony took place in the Museum of contemporary history in Ljubljana. The students made nice presentations and also the interviews were very good. Regarding their personal decisions not all chosen students participated in the interview. We have been disappointed with this but had to accept this rather strange decision as their privilege.
