

Report of the Slovenian history competition 2010-2011

Slovenian organizers organized in school year 2010/2011 competition with the topic connected with 20th anniversary of Slovenian independency. Due to various reasons (financial problems at the beginning of competition caused lack of contact with tutors, various similar projects), finally we received 8 papers made by 18 students. The entries were mainly from the same schools as usual. But the winning paper was made in the school not often participate in Eustory. The winning paper was also focused into local history. We are also very pleased with one paper in which a student found a connection with partners in Serbia and used the same questionnaire to interview students in their school and school in Serbia.

Among the entries there are some very good presenting interesting approaches. The award ceremony took place in Museum of contemporary history in Ljubljana. Students made nice presentations and also the interviews were good.
